According to Health Management Information System (HMIS), 2015, there are total 34 district hospital in Rajasthan however, there are just 19 sub-district hospitals. They fill the gap between district level hospitals and the block level hospitals. They are first referral units for the block population in which they are geographically located. They receive specialist cases from neighbouring PHCs and CHCs.

There are total 568 community health centres in Rajasthan and 2083 primary health centres in Rajasthan. Looking at the size of population it appears that there is a need to increase the number and strengthen the condition of CHCs in Rajasthan. CHCs would act as a referral centre for PHCs to make modern health care services accessible to the rural people and to ease the overcrowding in the district hospitals.

Delivery Care System (2015-16)

Institutional Deliveries at Public Institutions	75.7 percent
Institutional Deliveries at Private Institutions	24.3 percent
Deliveries at Home by Non-SBA	43.1 percent
Deliveries at Home by SBA	56.9 percent
