## BASIC AMENITIES & HEALTH

As per NFHS IV, in Rajasthan there is just 45 percent of household have improved sanitation, while the figure of Dungarpur is even less than the state average as it has just 32.9 percent of households with improved sanitation. The same source suggests that only 16.9 percent of household in Dungarpur and 31.8 percent of household in state use clean fuel for cooking. Apart from sanitation facility and clean fuel, 90.7 percent of household have improved drinking water source in Dungarpur. While in Dungarpur, just 78.7 percent of household have electricity facility, across the state, overall 91 percent of household have electricity facility.

In terms of health facilities, besides a district hospital, there is a network of sub-health centres (SHCS/Sub-HCs), Primary Health Centres (PHCs) and Community Health Centres (CHCs) across the district. CHCs have the highest spread, followed by PHCs and then sub-health centres. Hence, CHCs and PHCs cater to a higher proportion of population than sub-health centres. The Sub-Centre is the most peripheral and first contact point between the primary health care system and the community. There is a PHC for 6 Sub-Centres while CHCs act as a referral unit for 4 PHCs.
